Yes data will be coming to ESAT for validation.

Please direct any and all questions concerning Dimock sample analysis, validation, lab assignments, analytical results, etc to either myself or Cindy Caporale. This includes questions generated within our organization but especially questions rec'd from outside OASQA and EPA.

NO EXCEPTIONS!!!

So does this mean no data will be coming for R3 ESAT data validation?

Thanks!!!!!!!!!!

Everyone,

This is an update on which labs are analyzing Dimock samples.

Dan,
All the Tier IV labs are being done under R33917.
As for all the other case Nos.:

R33907 – All analyses being performed by OASQA. **Note: OASQA authorized sampling tem to use the proj # CT5865 on COCs for ALL the EPA labs to simplify the task for the sample management team.**
R33908 – this can be cancelled, being done under R33917. These analyses are being done by Isotech Analytical Laboratories (I don't think I ever received the individual DAS assignments that broke out the Tier IV).
R33909 – These analyses being done by EPA Region 2 lab;
R33910 – These analyses being performed by NAREL.
R33911 - These analyses being done by EPA Region 9 lab;
R33912 – Cancel this case. The bacteria tests are being done by a local lab – Northeastern Environmental Laboratory and the turbidity is being done using field screening with no lab.

R33917: All Tier IV labs should fall under this. However, the sample management team used "TL01-11-12-001" as the case No for samples being shipped to TestAmerica Buffalo (TA), because this was added about one week into the project and we didn't have the data validation request in at that time. Tier IV Labs/analyses as follows:

Total/fecal coliform and HPC – Northeastern Environmental Laboratory, Scranton, PA.
Compositional gas analysis; Isotopes of methane/water – Isotech Laboratory, Inc.
Ethylene glycol – Pace analytical Indianapolis (later discontinued using Pace due to high detection levels)
Glycols – TA Buffalo (added one week into sampling – COCs use TL01-11-12-001 as Case No.

Ethylene glycol – TA-Buffalo (after ceased analyzing for all the glycols)

Subject: Please clarify which labs are analyzing DIMOCK samples.

Please indicate and clarify which labs are performing analysis.

Are you using the following DAS cases?

Should we cancel the case since you requested to consolidate every tier 4 lab into one case (R33917)
